

## Peer Advisory Group Designed for Tech Leaders

Cohorts of up to 12 Founders, Presidents and CEOs meet virtually once a month for a professionally facilitated business advisory meeting. All members are associated with B2B tech industries.

Topics are selected by the cohort based on the exact issues facing the members – not a predetermined curriculum of topics. All discussion will be relevant to your cohort.

Each member receives a monthly one-on-one business consulting session to work on accountability, strategic planning, business model, vetting opportunities or any topic of your choice. Members can invite team members and staff to join him or her at their discretion.

Subject Matter Experts are invited as guest speakers for each topic to add to learning and provide expert direction.

No direct competitors are represented in each cohort so you can speak frankly about business issues. Confidentiality is paramount.

TABA funds associated with SBIR grants are a perfect use for your m.b.a. membership to work on business and operational elements of your business.

Membership commitment is one year and by invitation only.
